FOUNDERSLIVE MOMBASA · DEALS DEN · 29 OCTOBER 2026

Snack Quest

We sell vending machines to Kenyan business owners, stock them and run them, so owners have a vending business without having to run one.

RAISING KSH 10M · FIRST CLOSE KSH 3M

Kelvin Kimathi, Founder & CEO · **Michael Monyao**, Co-founder & CTO · 0759 209 705 · snackquests.shop

THE PROBLEM

Owning a vending machine in Kenya means renting a payment terminal and running everything yourself.

A rented terminal

An M-Pesa terminal fixed to the machine, paid for every month.

All the running

Buying stock, restocking and counting sales are the owner's job.

No idea what it earns

Buyers' first question: when do I get my money back?

For business owners who want a machine at their premises, and people who want to own one as a business.

From our calls with machine owners and the 200+ people who asked us about buying one.

THE SOLUTION

Buy the machine. We run it.

1

M-Pesa built in

Payments go straight to the owner’s own till. No terminal to rent.

2

Stocked and restocked

Snacks people want, half imported Asian, half Kenyan, delivered and loaded for the owner.

3

Watched from a phone

Sales, stock and restocks in the owner portal.

Built: M-Pesa checkout at the machine and the owner portal. Being built for launch: payments into each owner’s own till.

VALUE PROPOSITION

Cheaper to start, nothing to run, snacks that sell.

	BUYING A MACHINE ON YOUR OWN	WITH SNACK QUEST
Payments	Rent or buy a terminal; M-Pesa set-up quoted at KSh 30,000–75,000	**Built in, paid to your own till**
Stock	Buy it and deliver it yourself	**Delivered and loaded for you**
Sales	Count them by hand	**Live in the owner portal**
Getting started	Find a site and a supplier alone	**We help find the site; machines in stock for fast installs**

M-Pesa set-up price: Bestcare Facilities Management's published price list. Pesapal rents handheld terminals at KSh 5,000 a month (pesapal.com).

HOW IT WORKS

Three steps for an owner.

KSh 350–450K

- Our system fitted at the factory
- M-Pesa paid to your own till
- Installed from stock, or within 1–2 months

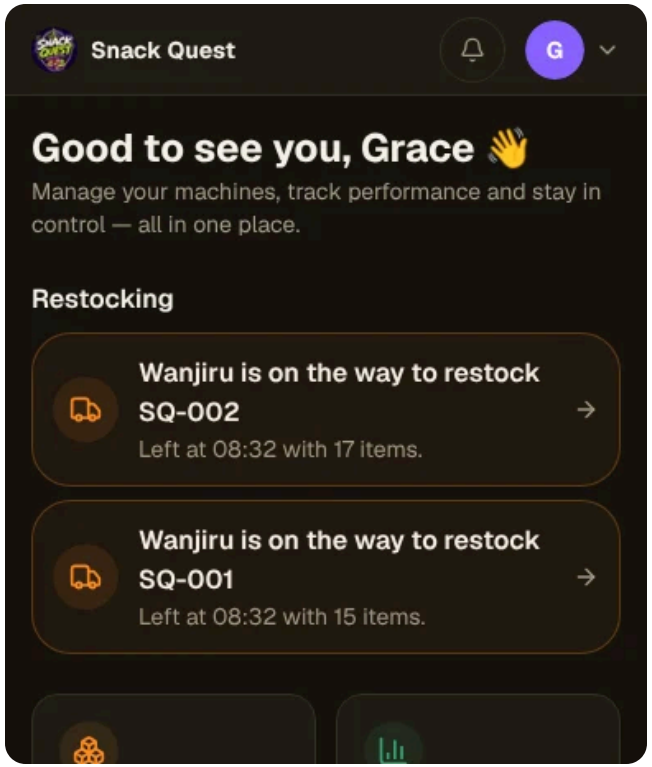

Buy your machine

Paid once. Installed at your site, or one we find.

We keep it full

Our delivery partner brings our snacks and loads the machine.

Shoppers pay by M-Pesa

Money lands in your till. You follow it in the portal (shown with demo data).

BUSINESS MODEL

Owners pay us three ways.

ONCE

KSh 350–450K

The machine, paid upfront. Our landed cost: KSh 300K.

EVERY MONTH

KSh 8,000

Full plan: stock planning, restocking, delivery and the portal. Software only: KSh 2,000.

EVERY RESTOCK

15–20%

Our margin on snacks from our wholesale price list. Full-plan owners stock only from us.

Why they pay: a vending business they don’t have to run. Plus the online shop: retail, wholesale and build-your-own boxes.

MARKET

A growing snack market that pays by phone, not by card.

€0.71bn

Snack food sold in Kenya in 2024, growing 8.75% a year to 2029.

54M

Mobile money accounts in Kenya, 88.8% of them on M-Pesa.

54,454

Card machines in the whole country. A vending machine has to take M-Pesa.

707,150

University students, up 12.5% in a year. Hostels and campuses come first.

OUR SLICE, COUNTED BOTTOM-UP

Each machine: KSh 100K profit on the sale, then KSh 96,000 a year in fees, plus our margin on every restock.

20–50
machines in year one

70–150
by the end of year two

KSh 6.7–14.4M
a year in fees alone at that point

Nobody has published a size for Kenya's vending market: our first machines give the first real sales per machine. Sources: Statista Market Insights, Snack Food: Kenya (2024 estimate); Communications Authority of Kenya, June 2026; Central Bank of Kenya, December 2025; Commission for University Education, 2025.

COMPETITION

Others sell the parts. We sell an owner the whole package.

Bestcare Facilities Management

Installs and repairs machines, restocks for facilities; M-Pesa set-up priced separately

Vending Services Kenya

Coffee and snack machines with monthly service, since 2000

Direct import (TCN, Alibaba sellers)

Machine only: M-Pesa unconfirmed, no stock, no service

Dukas, supermarkets, Glovo

Where people buy the same snacks today

Our edge

One package for an individual owner: the machine, M-Pesa to their own till, the stock, the restocking and the portal.

Honestly: they have years in the field. Our first machines go live with this raise.

From company websites and listings, October 2026.

GO-TO-MARKET

Cheap leads, a sales team, and sites we help find.

200+

machine enquiries from 5 days of ads

KSh 12

per lead: KSh 2,500 of ads in total

20–50

machines to sell in year one (target)

- **Acquire owners:** low-cost ads to business owners; a sales team converts them
- **Sites:** Nairobi student hostels, campuses, apartments and estates first
- **Retain:** a monthly service they would otherwise have to do themselves
- **Stay competitive:** snacks chosen from sales data; delivery gets cheaper per machine as machines cluster on our partner's routes

TRACTION

Nine weeks from first ad to buyers waiting.

20 AUG 2026

Launch

Ads live; online shop open with M-Pesa checkout.

23 AUG - 21 SEP

First 30 days

KSh 102,700

24 customers, KSh 4,279 average order.

28 DAYS TO 25 AUG

Attention

177.8K

TikTok views in 28 days; 33 creators on tracked links.

OCTOBER

Vending ads

200+

enquiries in 5 days; 80 say they have the money ready.

NOW

Ready to buy

3

buyers waiting for a site, a USIU alumnus among them.

Demand came cheap. What is missing is machines on the ground: that is what this raise buys.

Built along the way: M-Pesa checkout at the machine and the owner portal. No machines sold yet.

TEAM

A growth marketer and a software engineer.

Kelvin Kimathi

FOUNDER & CEO

Growth marketer at a Kenyan online gaming company. Built Snack Quest's shop, M-Pesa checkout and owner portal. Brought in 200+ machine enquiries for KSh 2,500 of ads.

MM

Michael Monyao

CO-FOUNDER & CTO

Software developer at Burn. Owns the security and reliability of the machine software and payments. Part-time today.

Hiring next

A sales team to convert enquiries and find sites.

Partners

Tushop for delivery (restocking test planned). Our manufacturer fits our system at the factory (quoted).

FINANCIAL OVERVIEW · PROJECTION

Owners pay upfront, so every machine sale brings cash in on day one.

	YEAR 1	YEAR 2
Machines sold	20–50	50–100
Machine revenue	KSh 8–20M	KSh 20–40M
Monthly fees	KSh 1.0–2.4M	KSh 4.3–9.6M
Machine profit + fees	KSh 3.0–7.4M	KSh 9.3–19.6M

Costs

About KSh 250,000 a month after the raise: team, delivery, ads. Two to three machine sales a month cover it.

Year 3

Snack Quest sections in supermarkets, then our own snack product, built on the sales data.

Projection from our targets, not results. Assumes KSh 400,000 average price and KSh 100,000 profit per machine; every machine on the KSh 8,000 plan, with half a year of fees in the year it is sold. Fees pay for delivery. Snack margin is not counted until machines are trading.

KSh 10M

About USD 77,000, for 20–30% equity. First close KSh 3M; KSh 7M once the first machines show their numbers.

- **First three machines** live and selling
- **Real sales per machine**, and owner payback from it
- **20 owners signed** on the monthly plan
- **Restock cost per machine** measured on Tushop's routes

FIRST CLOSE · KSH 3M

3 machines in stock, KSh 300K each	900,000
Salaries, first 3 months	600,000
Snack stock	500,000
Registration and legal	350,000
Owner's-own-till payments	150,000
One-off system setup	130,000
Contingency	120,000
Finding sites, installation	100,000
Ads to machine buyers	100,000
Restocking test with Tushop	50,000
Total	KSh 3,000,000

The stock machines are sold on to owners, so that money funds the next order.
